Profile Summary

- Proficient in analyzing complex datasets using Python, SQL, and ML libraries to derive actionable business insights and support data-driven decision-making.
- Skilled in building predictive models, data pipelines, and dashboards using Power BI and Scikit-learn for performance tracking and personalization.
- Strong hands-on experience in statistical analysis, anomaly detection, and time-series forecasting for real-world business use cases.
- Skilled in developing scalable AI solutions and extracting actionable insights from complex data to support business decision-making.

Technical Skills

Languages: Python, SQL (PostgreSQL), R, Java
Libraries & Frameworks: NumPy, Pandas, Scikit-learn, Matplotlib, Seaborn
Analytics & BI Tools: Excel, Power BI, Tableau, Power Query, Qlik
Databases: PostgreSQL, MySQL
ETL & Workflow: Alteryx, ETL Pipelines
Cloud & Deployment: AWS (Basic), Streamlit, Flask
Version Control & Dev Tools: Git, GitHub, Jupyter Notebook, VS Code

Education

Methodist College Of Engineering and Technology

Nov 2021 – April 2025

Bachelor of Engineering in Artificial Intelligence and Data Science - CGPA:9.3

Hyderabad, Telangana

Relevant Coursework

- | | | | |
|-------------------|-------------------------|----------------------|----------------------------|
| • Data Integrity | • Generative AI | • Data Visualization | • Data Mining |
| • Data Governance | • Requirement Gathering | • Data Manipulation | • Business Impact Analysis |

Projects

GeminiDecode: Multi-language Document Extraction | *Python, NLP, Regex, spaCy, NLTK* | GitHub **Jan 2024**

- Developed a scalable multilingual parser for PDFs, DOCX, and images, achieving 95%+ language detection accuracy.
- Applied regex and NLP(spacy, NLTK) to segment and classify 5,000+ text blocks with 98% accuracy.
- Improved processing speed by 30% through modular and customizable extraction pipelines.
- Enabled batch processing with a fault-tolerant architecture, reducing manual effort by 40% and improving system reliability.

The Anatomy of Amazon Sales | *Python, Time Series Forecasting, Pandas, Power BI* | Research Paper **Jan 2024**

- Analyzed 50k+ sales records to forecast demand and identify product-wise profitability.
- Implemented time series models to improve sales predictions by 15%.
- Created dashboards reducing manual reporting time by 30% for business insights.
- Co-authored research paper published in IJIRCCCE, contributing to e-commerce analytics.

Autism Support System | *Computer Vision, Audio Emotion, Multimodal AI* | Research Paper **Mar 2024**

- Engineered real-time emotion detection using facial, gesture, and audio inputs, achieving 92% recognition accuracy.
- Designed emotion-based games, increasing user engagement in children by 35% and aiding emotional learning.
- Engineered multimodal AI pipelines that improved system reliability by 25% and interaction accuracy by 18%.
- Published findings in IJCRT, demonstrating 87% therapeutic efficacy with clinical expert collaboration.

Qlik Airline Business Analytics | *Qlik Sense, SQL, Geo Analytics, Cohort Analysis* | GitHub **July 2024**

- Designed interactive dashboards tracking churn, routes, and KPIs, improving decision speed by 40%.
- Performed cohort analysis to improve retention and booking conversion by 5%.
- Used GeoAnalytics for route optimization and cost-saving insights (10% fuel efficiency).
- Delivered actionable insights in internal reports, influencing stakeholder decisions and strategy.
