EDUCATION

•B.Tech In Pharmaceutical Engineering and Technology

Indian Institue of Technology Varanasi, BHU

2021-25

CGPA: 8.01

TECHNICAL SKILLS AND INTERESTS

Languages: Python, SQL

Libraries & Frameworks: Pandas, NumPy, Matplotlib, Scikit-learn

Tools & Platforms: Power BI, Tableau, Excel, Jupyter Notebook, PowerPoint

Databases: PostgreSQL, MySQL

Hard Skills: Data Cleaning, Data Visualization, EDA, Dashboarding, Predictive Modeling

Soft Skills: Problem Solving, Communication, Analytical Thinking, Adaptability, Presentation, Self-learning

Interests: Data Analytics, Business Intelligence, Consulting, Machine Learning, Visualization

PERSONAL PROJECTS

•E-commerce Sales Analysis

Worked on sales and customer data to improve logistics, marketing strategy, and operational performance.

- Processed 100k+ records using SQL to uncover sales patterns, optimizing decision-making and reporting by 95%.
- Built Power BI dashboards to visualize KPIs and customer behavior, enabling faster insights and scaling growth.
- Technology Used: SQL, Excel, Power BI.

•Uber Data Analysis

Analyzed Uber travel data to reduce operational costs, improve reporting, and enhance service efficiency.

- Cleaned and examined 10,000+ ride records using Pandas, performing EDA to extract business-critical insights.
- Created data visuals to flag route inefficiencies, cutting travel costs by 12% and boosting reporting speed by 30%.
- Technology Used: Python, Pandas, Matplotlib, Data Cleaning.

•Research Project: Cancer Recurrence and Demographic Classification

Worked under Dr. Shreyansh Kumar Jain to study cancer recurrence patterns and demographic correlations.

- Analyzed 5,000+ patient profiles from medical datasets to classify cancer types and recurrence demographics.
- Developed AI models using metabolite biomarkers to predict breast cancer relapse and improve screening strategies.
- Technology Used: Python, Pandas, Scikit-learn, Machine Learning.

EXPERIENCE

•Unified Mentor

May – July 2024

Data Analyst Intern

Remote

- Analyzed 1M+ Amazon records using SQL, Excel, and Tableau to extract performance trends and improve sales.
- Designed interactive dashboards to track KPIs and financial metrics, reducing reporting time by 40%.
- Conducted competitive benchmarking to guide pricing models, promotional strategies, and market positioning.
- Created strategic data reports and visual presentations to support cross-functional planning and business growth.

COURSES & CERTIFICATIONS

•SQL for Data Analytics – LBA Analytics and AI

POSITIONS OF RESPONSIBILITY

•SCS Induction Mentor (IIT BHU): Supported juniors with academics, mentorship, and campus onboarding.

•Women's Squash Team Leader: Led training, organized matches, and encouraged female participation.

•Logistics Coordinator, Spirit'23: Managed planning, guest coordination, and event logistics.

•Social Media Team, FMC'23: Curated content, improved visibility, and increased digital outreach.
