EDUCATION

BV Raju Institute of Technology

Bachelor of Technology in Information Technology; GPA: 7.77

Narsapur, India

Jun 2020 – Aug 2024

TECHNICAL SKILLS

Programming Languages: Java, SQL, Python

Frameworks Tools: TensorFlow, OpenCV, Git

Databases: MySQL

Operating Systems: Windows.

Coursework: SDLC(Software Development Life Cycle), CN(Networking), DBMS(Database Management System)

PROJECTS

Migrant Mentor | *Java, XML*

- Developed a mobile application to aid migrants in adapting to new languages and cultures, enhancing user experience with localization tools.
- Enabled users to understand the culture of a specific location, the languages needed, and commonly used phrases for faster integration and communication.
- Followed OOP principles and modular coding standards to ensure maintainability and scalability.

Cogni-Watch: Next-Gen Video Surveillance System | *Python, OpenCV, Haar Cascade Classifier*

- Designed an intelligent video surveillance system that initiates recording upon detecting human presence, optimizing storage use, and enhancing security monitoring.
- Utilizing OpenCV, our system integrates motion, face, and body detection functionalities. Unlike conventional CCTV systems, our solution initiates recording only upon detecting the human presence, thereby conserving storage space and minimizing unnecessary footage.
- Enhanced system performance with modular design and code reuse.

NeuroScan: Early Alzheimer's Detection with Deep Learning | *TensorFlow, Keras, Python* Jan 2024 – Apr 2024

- Built a deep-learning framework for early Alzheimer's detection using brain imaging data, improving diagnostic accuracy through data augmentation and advanced image processing.
- We employed data augmentation strategies to enhance the ADNI dataset, improving model robustness and performance
- Utilized design principles, data preprocessing, and model validation for diagnostic accuracy improvement.
- Worked in a team using Git for version control and collaborative development.

PROFESSIONAL DEVELOPMENT

Collaborated in a 4-member team to build mobile and cloud-integrated applications as part of academic and personal projects

Practiced agile methodology to plan, develop, and test solutions aligning with business logic and quality standards.

Assisted peers in debugging issues and optimizing code performance using profiling tools and test cases.

ACHIEVEMENTS & CERTIFICATIONS

AWS Academy Cloud Foundations - Certified (12/2022)

SQL Intermediate - HackerRank (10/2024)

NPTEL Soft Skills Certification - Elite Badge

Secured 11k rank among 4 lakh students - TS EAMCET

Got 92 percentile out of 100 - JEE MAINS
