Skills

Java

Spring Boot

Data JPA

Hibernate

Spring MVC

Angular

MySQL

Jenkins

Microservices

Linux

Junit

Git

A passionate and results-oriented Full-Stack Developer with 3 years of experience designing, developing, and deploying robust and scalable web applications. Adept at utilizing Spring Boot, Microservices architecture, Angular, and MySQL to build high-performing systems that enhance user experiences. Proven track record in IT application monitoring, performance monitoring, and solution design across complex environments. Adept at utilizing Spring Boot, Microservices architecture, Angular, and MySQL to build high-performing systems that enhance user experiences. Skilled in middleware management, Java-based application log monitoring, and IT infrastructure support. I am also actively exploring cloud platforms (AWS) and learning about Gen AI to broaden my skillset and contribute to innovative solutions.

Work History

2024-09 - Current	Software Engineer Client Company: GE Digital (Payroll: Quesscorp), Hyderabad - Developed and maintained web applications using Angular to create dynamic and responsive user interfaces. - Integrated and customized data grids using AG Grid to provide rich features such as filtering, sorting, pagination, and grouping for data presentation. - Implemented comprehensive test cases using Jest and Jasmine to ensure the quality and reliability of software applications, including unit, integration, and end-to-end testing. - Collaborated with cross-functional teams to design, build, and scale solutions, ensuring efficient and optimal performance across various platforms. - Utilized version control systems like Git and participated in code reviews, ensuring code quality and maintainability. - Followed Agile methodologies to contribute to sprint planning, daily stand-ups, and retrospectives.
2023-12 - 2024-09	System Engineer Client Company: VodafoneIdea Ltd (payroll: Crossover), Pune

- Proposed technical feasibility solutions for new system designs and suggested options for performance improvement of technical components.
- Configured, tested and maintained network equipment to achieve maximum performance.
- Verified compliance with applicable performance metrics and compatibility expectations.
- Developed custom scripts for automating routine tasks, increasing overall productivity.
- Improved system efficiency by implementing and optimizing hardware and software components.
- Performed cost-benefit and ROI analyses for proposed systems.

2021-01 -
2022-10

Software Engineer

LTI MindTree

- Developed and maintained RESTful APIs using Spring Boot for Real time Eligibility System
- Implemented functionalities related to user authentication, data retrieval using Spring MVC and Spring Data JPA.
- Contributed to unit testing using JUnit and Mockito to ensure code quality and maintainability.
- Collaborated with cross-functional teams (QA, UI/UX) to ensure timely delivery and high-quality features.
- Gained experience with Spring Security, Spring Cloud to enhance the application's functionality.
- Proactively identified security vulnerabilities in application code, implementing necessary measures to mitigate risks.

Education

B.E.: Information Technology

Vasavi College Of Engineering - Hyderabad
