PROFESSIONAL SUMMARY

A highly analytical and results-oriented Data Analyst with advanced proficiency in Tableau and SQL. Specializes in transforming complex datasets into actionable insights and compelling visual narratives. Proven ability to develop interactive dashboards that improve reporting efficiency and support strategic decision-making. Seeking to apply my expertise in data modeling, visualization, and stakeholder collaboration to a challenging role in a data-forward organization.

TECHNICAL SKILLS

- **Data Visualization:** Tableau (Advanced), Power BI, Figma, Storytelling
- **Data Analysis:** SQL, Python (Pandas, NumPy), Excel (Advanced), Data Cleaning, ETL Processes
- **Databases:** MySQL, PostgreSQL (Basic)
- **Professional:** Stakeholder Communication, Requirements Gathering, Project Documentation

PROFESSIONAL EXPERIENCE

Software Development Intern | SECUREUP *July 2024 - December 2024*

- Contributed to the full software development lifecycle, with a specific focus on designing and implementing modules for efficient data handling and processing.
- Translated project requirements into technical tasks, ensuring features were rigorously tested for functionality and data accuracy.
- Maintained comprehensive project documentation and delivered regular progress reports to team leadership.

Data Analytics Internship *January 2025 - May 2025*

- Improved reporting efficiency by 20% by developing and maintaining over 15 interactive Tableau dashboards for sales, marketing, and operations.
- Ensured high data integrity by performing rigorous data cleaning and transformation using complex SQL queries across multiple data sources.
- Enhanced project outcomes by collaborating with stakeholders to gather requirements and translate business questions into detailed technical specifications.
- Identified key business trends and supported strategic planning by presenting data-driven insights and monthly performance reports to management.

Freelance UI/UX Designer

- Specialized in designing data-centric interfaces for startups, focusing on creating intuitive visualizations of complex datasets.
- Delivered wireframes and interactive prototypes that balanced aesthetic design with functional data visualization best practices.

KEY PROJECTS

Crime Data Dashboard (India 2001-2010)

- Engineered a dynamic Tableau dashboard to analyze national crime data, identifying key patterns and regional hotspots. This analysis was featured in a summary report on evolving crime trends.

Food Order App - Mobile UI/UX (March 2024 - July 2024)

- Designed a data-centric user flow and UI for a mobile food ordering app. The final design allowed users to visualize order history and spending patterns, leading to more informed purchasing decisions.

Bakery App - UI/UX Design (August 2024 - December 2024)

- Created layouts and wireframes for an e-commerce platform that included an integrated analytics dashboard, enabling the business owner to monitor sales performance and make data-driven inventory decisions.

EDUCATION

Master of Computer Applications (MCA) | MIT World Peace University, Pune *Expected 2025* | CGPA: 7.68

- Key Areas: Business Intelligence, Big Data & Data Warehousing

Bachelor of Computer Applications (BCA) | University of Allahabad 2020 - 2023 | CGPA: 7.5

CERTIFICATIONS

- **Google UX Design Certificate** - Coursera (February 2025)
- **Data Analytics Virtual Job Simulation** - Deloitte via Forage (June 2025)
- **Data Visualization: Empowering Business with Insights** - Tata & Forage (June 2025)

ACHIEVEMENTS & ACTIVITIES

- **Core Member, IT Forum** - MIT WPU
- Volunteer for university events including Codeathon, SLDP, and RIDE.
- Designed promotional materials for various university events.
- Active participant in college cultural and technical festivals.
