Education

SRM Institute of Science and Technology, Kattankulathur
BTech-Computer Science and Engineering (CGPA – 8.08)

Expected Graduation: June 2026

Pursuing **BTech in Computer Science and Engineering** at **SRM Institute of Science and Technology**. Strong foundation in **Machine Learning Algorithms, Embedded Systems, and Project Management**. Strong Knowledge in **Python Libraries** (Keras, TensorFlow, Pytorch, Transformers, ScikitLearn, Opencv, Numpy, Pandas), **Raspberry Pi**, Generative AI and **Full Stack Web-App Development**.

Skills: AI for Large Language Models for GenAI, Agile Project Management, Computer Vision, Data Science, Web App Development, Business Analytics .

Course Work: Operating systems, Data Structures, Analysis of Algorithms, Embedded Software, AI, Org. of Digital Computers, Designing Compiler, Computer Networks, Machine Learning, Deep Learning, Pattern Recognition Techniques, Speech Recognition/Computer Vision.

Project Experience

ChattyBot –

- Full-stack AI chatbot built using Google Gemma models, delivering 24/7 intelligent, context-aware communication.
- Continuous conversation flow with under 1-second average response time, ensuring smooth user engagement.
- Multilingual support for 10+ languages including Hindi, French, and Russian, enabling global reach.
- Automatic language detection with 95%+ accuracy for natural, context-preserving interactions.
- Modern, responsive UI optimized for 100% cross-device compatibility (desktop, tablet, mobile).

IPL Match Prediction-

- Built an IPL Victory Predictor web app using Streamlit, pandas, scikit-learn, and joblib.
 - Processed 73,304 ball-by-ball records from 756 IPL matches (2008–2020).
 - Achieved 81%+ prediction accuracy using machine learning.
 - Features: team/venue selection, real-time match inputs, and dynamic probability visualization.
 - Deployed interactive UI with custom styling and image assets.
-

Work Experience

Project Management Intern – Cardiff Met (Wales)

Jan 2025-May 2025

- Oversaw documentation and communication workflows throughout the development lifecycle of the Hindi–Tamil Translation App.
- Coordinated between development, design, and QA teams to ensure clarity, consistency, and timely project updates.
- Maintained organized project records to support efficient decision-making and smooth delivery.

Business Analyst - Team 1.618

Aug 2023 - Dec 2024

- Analyzed budget allocation and implemented strategies to optimize cost efficiency across multiple stages of vehicle development.
 - Conducted comprehensive market research and competitor analysis to guide strategic planning and design decisions.
 - Supported sponsorship acquisition by preparing professional business proposals and detailed financial reports, ensuring alignment with industry standards.
-

Soft Skills – MS Powerpoint, MS Excel, MS Planner, SQL Queries, UI/UX Design, Basics of Cloud Computing, Project Management Abilities, Leadership/Communication skills.
