PROFILE SUMMARY

Motivated Information Science and Engineering graduate with strong skills in Java, Python, and full-stack web development. Experienced in building responsive applications using React.js, SQL, and Bootstrap. Completed key projects including a Healthcare Chatbot, Maid Hiring System, and Bird Classification using deep learning. Known for problem-solving, adaptability, and a commitment to continuous learning in tech-driven environments.

EDUCATION

Bachelor of Engineering in Information Science and Engineering

Maharaja Institute of Technology, Mysore | Mysore, Karnataka

2021-2025 | **CGPA:** 7.7

12th Science (State Board)

Government PU College | T Narasipura, Mysore, Karnataka

2019- 2021 | **Percentage:** 67%

10th (State Board)

St. Marys High School | T Narasipura, Mysore, Karnataka

2019 | **Percentage:** 71%

SKILLS

Languages: C, Java, Python, JavaScript, HTML/CSS, SQL

Frameworks/Libraries: React.js, Bootstrap

Tools & IDEs: Git, PyCharm, Eclipse, XAMPP

Database: MySQL

Soft Skills: Problem Solving, Communication Skills, Time Management, Attention to Detail

PROJECTS

Words-per-Minute Calculator Site for Typing Speed Master Site

Jan-Mar 2023 | **Tools:** HTML, CSS, JavaScript, SQL

- Developed fully functional web templates and implemented user-friendly web pages.
- Integrated databases for efficient data collection, storage, and sorting.
- Collaborated closely with the project team to ensure the successful execution of design briefs.

Healthcare Chatbot using ML

Jan-Mar 2024 | **Tools:** python, machine learning, html, css

- Developed a platform for intelligent medical query responses.
- Designed an intuitive user interface using HTML, CSS, and python.
- Implemented Machine Learning-based text processing to enhance accuracy. Designed and tested chatbot interactions for improved user experience in healthcare support.

Maid Hiring Management System

June-Aug 2024 | **Tools:** PHP, HTML, CSS, SQL, xampp, javascript

- Developed a web-based platform for efficient maid hiring and management.
- Implemented user authentication, maid listing, booking, and scheduling features.
- Used php, html, css, sql, xampp, javascript.
- Ensured data security and scalability with robust backend architecture.

Birds Classification & Identification

Jan-May 2025 | Tools: Python, TensorFlow, Keras, EfficientNet B3, HTML, CSS

- Developed a deep learning-based system to classify bird species from images using EfficientNet B3 architecture.
- Applied advanced preprocessing techniques including image augmentation and noise reduction to improve accuracy.
- Deployed a responsive web application enabling real-time bird species identification with over 80% accuracy.

INTERNSHIPS

Web Development Intern

INVENTRON TECHNOLOGIES | Oct-Nov 2023

- Built a dynamic movie website using HTML, CSS, JavaScript.
- Enhanced site responsiveness and UX by implementing mobile-first design.

AI-DEVOPS INTERNSHIP

ROOMAN TECHNOLOGIES (NSDC/IBM) | Sep 2024 – Dec 2024

- Automated deployment pipelines using Jenkins and GitHub.
- Learned system monitoring, disaster recovery, and Linux automation.

ACADEMIC ACHIEVEMENTS

Database Management System Certification

National Programme on Technology Enhanced Learning (NPTEL) | Jan – Mar 2024

- Gained proficiency in SQL, relational database design, normalization, and transaction management.
- Applied theoretical concepts through hands-on assignments and real-world case studies.
- Demonstrated practical understanding of data models and database operations.
