BUSINESS MANAGEMENT & ANALYSIS

Motivated and results-driven Engineering graduate seeking a challenging role as a Business Analyst or Project Manager in a dynamic organization. Possess strong skills in data analysis, business strategy, and project execution, with proven ability to deliver successful outcomes, enhance efficiency, and thrive in cross-functional collaborative environments.

KEY COMPETENCIES

Process improvement	Problem Solving	Strong interpersonal skills
Data-driven strategic planning	Critical thinking skills	Proactive and self-motivated
Attention to Detail	Excellent communication skills	Exceptional organisational skills

PROFESSIONAL EXPERIENCE

Infosys Ltd **Mar 2022 - May 2023**
Test Engineer

- Collaborated with cross-functional teams to conduct 100+ test cycles, including functional, regression, and integration testing for client-facing applications, contributing to a 25% improvement in test coverage.
- Developed and maintained manual test cases, and supported the creation of automation scripts to enhance overall test efficiency.
- Identified, documented, and tracked 75+ defects using internal tools (e.g., ALM), ensuring resolution within standard SLA timeframes and helping reduce post-release defects by 20%.
- Participated in sprint planning and retrospectives within Agile methodology, contributing to continuous improvement initiatives and team alignment.
- Provided detailed feedback on software usability and performance, helping stabilize production releases and contributing to 99% uptime for key application components.

Infosys Ltd **Sep 2021 - Feb 2022**
System Engineer

- Completed intensive training in software engineering principles, SDLC, and testing methodologies.
- Actively participated in daily stand-up meetings and gained exposure to client communication and project coordination.
- Conducted smoke testing and assisted in system validation tasks to ensure smooth deployment of internal applications.
- Supported junior engineers and team leads in documentation and quality assurance reviews, gaining practical experience in real-world software delivery.
