EDUCATION

Indian Institute of Technology Patna

B.S. in Computer Science and Data Analytics

Patna, India

July 2024 – May 2028

Aspire Institute

Aspire Leaders Program in Leadership

Remote

April 2024 – Nov 2024

- Engaged in interactive learning modules, global peer discussions, and mentorship with faculty from top universities.
- Built competencies in critical thinking, ethical leadership, effective communication, and innovative problem-solving.

Stanford University (Code in Place 2025)

Introductory Python Programming Course

Remote

April 2025 – June 2025

- Participating in Stanford's global coding initiative, focusing on core Python programming concepts and software development practices.
- Collaborating with a worldwide cohort and receiving instruction from Stanford educators and industry mentors.

EXPERIENCE

NxtJob.ai

Business Development Intern

Remote, Bengaluru, India

April 2025 – May 2025

- Identified referral and networking opportunities by researching key decision-makers and HR professionals on LinkedIn for client-approved job roles.
- Utilised NxtJob's internal tools to track outreach, monitor job progress, and manage client communications efficiently.
- Gain expertise in open market and blue ocean job search strategies to enhance client interview conversion rates.

Celebal Technologies

Power BI Intern

Remote, Jaipur, India

June 2025 – Present

- Undergoing structured training on Power BI through curated internal content, focusing on business intelligence and data visualisation techniques.
- Contributing to a live project using internal datasets to design interactive dashboards and generate actionable business insights.

IIIT Pune

Data Privacy Intern

Pune, India

July 2025 – Present

- Reviewing various research papers related to large-scale data privacy using machine learning.

PROJECTS

AI Healthcare Chatbot | *Streamlit, LangChain, Pinecone, GROQ*

April 2025 – May 2025

- Link:** https://github.com/soudeeptikadar/AI_Healthcare_Chatbot
- Designed and created an AI-powered healthcare chatbot using open-source models to deliver accurate and real-time responses to health-related queries.
- Trained the chatbot using a 5000-page dataset with fine contour vectorisation for better semantic understanding and personalised recommendations.
- Implemented the frontend using Streamlit and integrated LangChain, Pinecone, and GROQ to enhance LLM performance and vector-based retrieval.

YouTube Insights Automation Tool | *Python, YouTube API, Google Sheets API*

Feb 2025 – Mar 2025

- Link:** https://github.com/soudeeptikadar/yt_scraper
- Built a Python automation tool to analyse YouTube channel performance over a rolling 15-day window.
- Integrated YouTube Data API to extract key metrics—views, likes, comments, and engagement—and synced them in real-time with Google Sheets via Sheets API.

- Implemented automated data cleanup and syncing workflows to enhance performance tracking and reporting efficiency for content creators.

Injury Dashboard Analysis | *Microsoft Excel*

Jan 2025

- **Link:** https://github.com/soudeeptikadar/Injury_Dashboard_Analysis
- Designed an interactive Excel dashboard to analyse workplace injury data across multiple plants and years.
- Utilised slicers, pivot charts, and KPIs for dynamic filtering and impactful visualisations.
- Applied structured layouts and custom visuals to enhance data storytelling and improve insight delivery.

Bike Sales Dashboard | *Microsoft Excel*

Dec 2024

- **Link:** https://github.com/soudeeptikadar/Bike_Sales_Dashboard
- Designed an Excel dashboard using Pivot Tables and Charts to analyse customer purchasing behaviour in the bike industry.
- Incorporated slicers and visual filters to segment data across income levels, age groups, commute distance, and regions.
- Generated actionable insights to support data-driven business decision-making.

Coffee Sales Performance Dashboard | *Microsoft Excel*

Nov 2024

- **Link:** https://github.com/soudeeptikadar/Coffe_Sales_Dashboard
- Created an interactive sales dashboard to monitor coffee sales across roast types, sizes, and countries.
- Highlighted top-performing countries and customer segments using visual analytics and slicers.
- Improved strategic decision-making through insightful and easy-to-interpret visual storytelling.

TECHNICAL AND PROFESSIONAL SKILLS

- **Languages:** Python, Advanced Excel
- **Frameworks:** Flask
- **Libraries:** pandas, NumPy, Selenium
- **Developer Tools:** VS Code, Jupyter Notebook, Google Colab, Eclipse
- **Data Skills:** Data Analysis, Dashboarding, Report Generation
- **Professional Skills:** Critical Thinking, Problem Solving, Decision Making, Leadership
