## EDUCATION

---

**Bachelor of Technology**, Pranveer Singh Institute of Technology  
*major in Computer Science and Engineering*

**Expected 2025**

## RELEVANT COURSEWORK

---

Object Oriented Programming, Database Management System, Web Development, Machine Learning, Computer Networks, Software Engineering, Operating Systems.

## EXPERIENCE

---

### 1. Salesforce Developer Virtual Internship 11/2023 - 01/2024

- Successfully completed an 8-week Salesforce Developer Virtual Internship from November 2023 to January 2024, mastering 15 key Trailhead modules.
- Gained expertise in Salesforce Fundamentals, Organizational Setup, and Relationship & Process Automation, demonstrating proficiency in more than 20 real-world scenarios.
- Developed strong skills in Apex, Testing & Debugging, and Lightning Web Components (LWC), as well as API integration using VS Code and CLI, resulting in a 30% improvement in code efficiency.
- Achieved three prestigious Superbadges: Apex Specialist, Process Automation Specialist, and Developer Super Set, completing 50+ hands-on challenges to earn these accolades.

### 2. Project Intern at IIT Kanpur 12/2022 - 01/2023

- Engineered a **network monitoring tool (traffic analyzer)** that successfully monitored and analyzed network traffic, identifying potential bottlenecks and security threats with precision 95%.
- Enhanced overall network efficiency and security by strategically identifying and addressing issues, resulting in a 20% improvement in network performance and a 30% reduction in security incidents. .
- Provided network administrators with real-time insight into network performance, empowering them to make informed decisions and reduce downtime by 15%. .
- Demonstrated the robustness and scalability of LAMP architecture in creating a reliable network monitoring solution, capable of handling high traffic volumes with minimal latency and supporting over 10,000 simultaneous connections.

## PROJECTS

---

### 1. Credit Card Fraud Detection 06/2024 - Present

- Developed a powerful web application using Django to detect credit card fraud in real-time. The system achieved an impressive 99.7% accuracy, ensuring that user transactions remained safe and secure.
- Added advanced features such as instant fraud alerts and transaction tracking, which reduced false alarms by 30%. Most alerts were processed within 5 minutes, creating a more reliable and efficient experience.
- Designed a user history tracking feature that made the app more user-friendly and compliant with regulations. This improvement improved user retention by 25%, making it a go-to platform for secure transactions.

### 2. Car Buying and Selling Website 11/2023 - 04/2024

- Crafted an intuitive online car marketplace using HTML, CSS, and JavaScript, integrated with a highly accurate predictive model. This improved user experience and marketplace efficiency, and users found the correct car price in 90% of the cases.

- Evaluated data from over 800 listings, refining the model to achieve a prediction accuracy 95% for used car prices. Reduced error margins by 20%.
- Utilized Python libraries including NumPy, Pandas, Flask, and Scikit-learn to develop scalable and robust applications, resulting in a 30% increase in computational efficiency and 25% decrease in processing time.

### 3. Anomaly Detection in Network

12/2022 - 07/2023

- Designed and crafted an Anomaly Detection System in Networks using Machine Learning, achieving an accuracy of 94% and a precision of 92% in detecting anomalies. .
- Integrated the trained model into the network infrastructure, allowing real-time monitoring and rapid response to anomalies, reducing detection time by 40%.
- Enhanced network performance by identifying unusual traffic patterns that could lead to congestion or downtime, resulting in a 25% decrease in network outages and a 20% improvement in overall network stability.

## SKILLS

---

|                      |                                                                      |
|----------------------|----------------------------------------------------------------------|
| Technical Skills     | Java, C++, Python, C, HTML/CSS, JavaScript, SQL                      |
| Developer Tools      | Git, GitHub, Visual Studio Code, Eclipse, IntelliJ IDEA              |
| Frameworks/Libraries | React, Node.JS, Django, Flask, NumPy, Pandas, Matplotlib, Tensorflow |
| Additional Skills    | Microsoft Excel, Microsoft word, Microsoft PowerPoint                |

## CERTIFICATIONS AND TRAINING

---

- “Network Monitoring Tool” by Indian Institute Of Technology, Kanpur
- “Salesforce Developer Virtual Internship” by Salesforce
- “Machine Learning” by Aican Automate
- HTML/CSS and JavaScript Certificate
- Programming Fundamentals using Python Certificate

## LANGUAGES

---

- English - *Fluent*
- Hindi - *Native*

## ACHIEVEMENTS

---

- Selected for **PSIT TechExpo 2024**, showcasing the ”Credit Card Fraud Detection” project. Further nominated for prominent tech events held at **IIT Kanpur**
- Completed an **internship at Infosys Springboard**, gaining hands-on experience with industry-leading technologies and practices.
- Solved over **400 problems on various coding platforms, including HackerRank, Leetcode, Geeks-forGeeks.**
