Process Improvement: Gap analysis, control enhancements, process re-engineering

Tools & Technologies: Microsoft Excel, PowerPoint, JIRA, Dynatrace

Testing & QA: UAT planning, test case development, execution & signoff

Soft Skills: Communication, stakeholder management, problem-solving, adaptability

Methodologies: Agile (Scrum), Waterfall

PROFESSIONAL EXPERIENCE

Technical Support Engineer, HDFC BANK (CONTRACTUAL) 10/2023 – Present | Turbhe Navi Mumbai

- Monitored real-time system performance for UPI top merchants, enabling early detection of anomalies and minimizing business impact.
- Proactively alerted internal and external stakeholders during performance degradation and transaction anomalies.
- Conducted deep-dive analysis of merchant APIs and enterprise transaction flows, converting raw data into actionable intelligence.
- Executed timely incident communication with clarity and precision, reducing confusion during outages.
- Identified recurring patterns and trends through SQL and data analytics to drive data-backed decision-making.
- Collaborated with Product, Engineering, and Customer Success teams to troubleshoot issues and propose sustainable solutions.
- Performed trend analysis on incident data to reduce service volume and improve uptime.
- Promoted adherence to application support SLAs, policies, and procedures across all touchpoints.

SKILLS

Ability to work under pressure • Time management • Teamwork • Risk management • Project management • Decision-making skills • Adaptability • Troubleshooting

Projects

User Acceptance Testing Coordination:

Led UAT efforts for Aadhaar tokenization module, ensuring compliance with regulatory mandates and business needs.

Client Experience Optimization:

Partnered with stakeholders to streamline the dispute management process, increasing resolution efficiency by 25%.
